

Choose which module or modules best *fit* your organization's needs and training time available.

Module 1
***FORKLIFT**
3 hrs - \$30/person
(Monday)

- causes of forklift injuries
- prevention overview
- forklift stability
- forklift capacity
- maintenance
- rules of forklift operation
- driving with a load
- unloading
- lowering
- stacking

Forklift Certification

Module 2
***MEDIC FIRST AID/CPR**
5 hrs - \$50/person
(Monday)

- First Aid provider's role
- approaching the patient
- basic life support
- bleeding and shock
- choking
- continuous patient care
- caring for illness
- caring for injury
- specific First Aid problems
- additional considerations

Medic Card

Module 3
***OSHA 10 HR**
10 hrs - \$100/person
(Tuesday)

- intro to OSHA
- fire safety
- bloodborne pathogens
- hazardous communication
- electrical safety
- personal protective equipment
- slips, trips and falls
- machine guarding
- materials handling
- emergency action plans

OSHA Card

Module 4
***RIG PASS**
16 hrs - \$395/person
(Tues/Wed)

- safety awareness
 - confined space
 - fire safety
 - lockout/tagout
 - bloodborne pathogens
 - hazardous communication
 - electrical safety
 - fall protection
 - personal protective equipment
 - hydrogen sulfide (H2S)
 - substance abuse
 - environmental awareness
- basic tools and equipment
- proper tool use
- terms and definitions

**IADC, ETC Card and/or OSHA 10 HR*

Module 5
HANDS-ON TRAINING
8/16 hrs - \$195/person/day
(Thurs/Fri)

Actual Hands-on training available in each of these speciality areas:

- floorhand training for drilling
- well servicing
- field technicians
- production technicians

Module 6
FIELD TECHNICIAN TRAINING
16 hrs - \$395/person

- occupational safety tasks
- tool use and safety tasks
- general tasks for tubular goods
- tasks for pipe fitting, equipment configuration and pumping units
- tasks for environmental awareness

Module 7
PRODUCTION TECHNICIAN PUMPER TRAINING
24 hrs - \$495/person

- general lease responsibilities
- pumping unit operations
- wellhead systems for pumping wells
- sucker rod pump systems
- free plunger lift systems
- separator heater treatment operations
- chemical treatment systems
- oil and produced water storage
- compressor operations
- gas measurement systems
- water injection systems
- community/landowner relations

Module 8
FLOORHAND TRAINING FOR WELL SERVICING
16 hrs - \$395/person

- general safety
- basic tool identification
- rod servicing
- tubing servicing
- rigging
- swabbing

Hands -on training available to enhance the learning process

Well Control

Well Control for Drillers & Derrickhands

*Introductory Level Well Control for Well Servicing
8 hrs-\$195/person

Topics in above classes include: gas & fluid characteristics, surface equipment, kick fundamentals, procedures and problem solving.
Note : Well Control for Well Servicing and Supervisory Level Well Control is IADC certified.

***IADC**

***Supervisory Level Well Control**

- 3 day-\$695/person - Drilling
- 4 day - \$795/person - Drilling, Workover, Completion, Well Servicing

Topics include: blowout (w/hands-on simulator), kick, basic pressure concepts, pressure applications, u-tube, volume calculations, annual capacity, pump calculation, psi correction, fluid characteristics & behavior, mud balance, viscosity, gas characteristics & behavior, well control procedures, methods & equipment, rules & regulations, workover & completion, packers, landing nipples, bullheading

education and training at the *speed* of business

**Discount rates available for companies reserving full classes.*

high plains TECHNOLOGY center

High Plains Technology Center's **Energy Training Center** is the official mid-continent site for premier oil and gas training.

The program was started in December, 2005, and since that time, over 4,200 potential workers have been trained in skills areas designed to help workers work as safely as possible in the oil and gas industry.

The training is unique in that participants use simulators and hands-on training coupled with time in the classroom to ensure students are trained in the most realistic environment.

The Center is committed to providing the highest quality training to strengthen the workforce for our domestic energy industry.

Sponsoring Companies

The **Energy Training Center** relies heavily on corporate sponsorships to maintain the programs operational expenses and to guarantee our curriculum meets the latest needs of the industry.

Numerous benefits are available to companies joining our sponsorship program (\$1,000 contribution), including

- priority reservations on all training classes available
- assistance with employee recruitment via trade shows, on-line initiatives, and general promotion and advertising efforts
- reduced training rate for classes of 10 or more from the sponsoring company
- a seat on our Advisory Board of Directors to determine future curriculum and class offerings
